

Columbus Regional Healthcare System

From the President and CEO: Columbus Regional Healthcare System considers it a privilege to give back to our community. Our primary contribution is to provide healthcare to those in need, regardless of their ability to pay. However, this is only the beginning. From uncompensated patient care to community services and programs, to health education and medical research, Columbus Regional Healthcare System continues to demonstrate its commitment to serving the citizens of our region. In fiscal year 2007, our community contributions totaled over \$9.7 million, representing nearly 14 percent of Columbus Regional Healthcare System's total budget (\$71.2 million), or approximately \$26,800 each day. Additionally, Columbus Regional Healthcare System served as an economic catalyst for the community, as one of our county's largest employers and a significant purchaser of goods and services.
